Services:

We use our experience and professional judgment in guiding our clients through the technical maze of the law in assisting them with their legal needs, which often include preparing contracts and other legal documents, or handling the defense or prosecution of civil litigation, or the defense of criminal charges. While it is impossible to determine in advance the nature and extent of the necessary legal services needed in litigated client matters, or to predict the behavior and responses of any opposing party or how that might affect fees and costs, we do our best to work with our clients to keep costs down and to resolve litigated disputes.
